github.com/KumarTanmay554

## EDUCATION

### VIT Bhopal University

Bachelor of Technology in Computer Science

CGPA - 8.42/10

Aug. 2022 – Jul. 2026

## TECHNICAL SKILLS

**Languages:** Python, C++, JavaScript, Typescript, GO, SQL, PostgreSQL, HTML/CSS

**Frameworks and Libraries:** React, Next.js, Node.js, Hono, Tailwind, MongoDB, Matplotlib, Numpy, Pandas

**Developer Tools:** AWS, Git, Docker, Postman

## EXPERIENCE

### NoBroker Technologies Solution Pvt Ltd.

Data Analyst Intern

Bengaluru, Karnataka

Jan. 2025 – Mar. 2025

- **Preprocessed** and validated **50,000+** real-estate records using **Python**, **Pandas**, and **NumPy**, increasing **data reliability** by **85%** and reducing noise for downstream ML models.
- Built and fine-tuned an **XGBoost** regression model using **Python**, **scikit-learn** boosting prediction accuracy by over **30%** compared to baseline models.
- Conducted value-based explainability analysis with **SHAP** (SHapley Additive exPlanations) in **Python**.

## PROJECTS

### Dine-In | Typescript, Next.js, Prisma, Supabase

[Live Link](#)

- Developed a **Next** web application using **TypeScript** and **React**, leveraging **Server-Side Rendering (SSR)** and **server actions** to achieve a **less than 3 second load speed**.
- Developed key features like **real-time table availability**, full-cycle **reservation handling**.
- Build modular, reusable **React components** with robust state management, enabling a **reduction in UI-related bugs**.

### Medium (Clone) | Javascript, Typescript, Hono, React, PostgreSQL

[Live Link](#)

- Build a production-ready **scalable, full-stack Medium-style blogging platform** from the ground up, achieving a **95% Lighthouse performance score** across core web vitals
- Delivered **less than 1 ms Request Duration** using **Hono (JavaScript)** and implemented **optimized caching strategies**, resulting in a **60% improvement in backend efficiency**.
- Designed and integrated a highly performance **PostgreSQL** schema with advanced **indexing and query optimization**, enabling **content retrieval in under 5ms**.
- Utilized **Turborepo** to significantly reduce **build and deployment times**, laying the foundation for a fast, modular **CI/CD pipeline** and seamless multi-package development.

### Human Resource Management System | Typescript, Python, Next, Go

[Github](#)

- Designing and developing a scalable **HRMS platform** with **TypeScript** and **Next.js** for the frontend, **Golang** for backend microservices, and **Python** for advanced **data analytics** and **automated reporting**.
- Implemented **CRUD** (CREATE, READ, UPDATE, and DELETE) operations in the backend using **Golang**, ensuring efficient data handling and storage and created a responsive frontend.
- Planning integration of **LLama-based AI models** to deliver predictive analytics for **employee retention**, **applicant tracking**, and data-driven HR decision-making.

## CERTIFICATIONS

### Oracle Cloud Infrastructure 2025 Certified AI Foundations Associate

- Issued by Oracle
